Raghad Hanon

.NET Backend Engineer

Tulkarm, Palestine | raghadhanoon2015@gmail.com | +970 598 373 380 | LinkedIn | GitHub | Portfolio

Summary

Backend engineer who ships production-style .NET systems end to end: Clean Architecture, CQRS, multi-tenant security, background workers and AI integration. Led a 4-person team to deliver a 290+ endpoint platform as a graduation project, and ranked 1st in the College of Engineering & Technology (GPA 93.21/100). Strong in testing, API design and CI/CD, with a competitive-programming background (918+ Codeforces problems).

Technical Skills

- **Backend:** C#, .NET 8, ASP.NET Core Web API, Entity Framework Core, LINQ, SQL Server, SignalR, ASP.NET Identity, JWT and refresh tokens.
- **Architecture:** Clean Architecture, CQRS (MediatR), SOLID, Dependency Injection, Repository and Unit of Work, multi-tenancy, RBAC and policy-based authorization.
- **Quality and tooling:** xUnit, Moq, AutoFixture, FluentValidation, AutoMapper, Swagger/OpenAPI, Git, GitHub Actions, Postman, EF Core Migrations.
- **Cloud and integrations:** Azure App Service, Azure SQL Database, Blob Storage, Azure AI Speech, SMTP, Cloudinary, Ollama/LLMs.
- **Frontend (working knowledge):** React, TypeScript, JavaScript, HTML, CSS, Bootstrap, MUI.
- **Other languages:** Java, C++.

Projects

Collabrium: Integrated Enterprise Management Platform

Team Lead and Backend Developer | Graduation Project | Oct 2025 – Jun 2026

- Led a 4-person team in two-week Agile sprints, turning requirements into API contracts for a multi-tenant platform with 13 modules (Auth, Tenants, Teams, Projects, Work Items, Sprints, Learning, Community, Notifications, Reports, AI and others).
- Built 290+ endpoints across 31 controllers on .NET 8 using a four-project Clean Architecture with CQRS/MediatR, EF Core, SQL Server, Repository/Unit of Work and read models.
- Secured the platform with ASP.NET Identity, JWT with refresh-token rotation, tenant isolation and layered role, policy and project-level authorization across 13 roles; enforced work-item and sprint domain rules.
- Added event-driven email (SMTP) and SignalR notifications, scheduled background workers, and 10 PDF/chart reports with sprint summaries.
- Integrated a local LLM (Ollama, Gemma 3) to generate work items, roadmaps, skill-gap analysis and insights, with retries and fallbacks.

Hotel Booking Platform

Backend Developer | Dec 2024 – Jan 2025

- Built 52 REST endpoints covering authentication, hotel and room search, bookings, reviews, discounts and amenities, with availability and capacity checks, email confirmations and PDF invoices.
- Wrote 100+ xUnit tests (Moq, AutoFixture) covering booking rules, invoice calculations, authorization and transaction rollback.

Actify

Full-Stack Developer | Aug 2025 – Sep 2025

- Built an activity-planning social app (attendance, profiles, following, photo uploads, live comments via SignalR) with .NET 8, CQRS/MediatR, Identity and React/TypeScript; set up a GitHub Actions build-and-deploy workflow.

Professional Experience

Backend Intern, Foothill Technology Solutions, LLC

Aug 2024 – Jan 2025

- Completed structured backend training (C#, SOLID and design patterns, unit testing, EF Core, ASP.NET Core Web API, software architecture) through exercises and mini-projects.
- Delivered and deployed to Azure a final backend project with 50+ endpoints, using Clean Architecture, FluentValidation, AutoMapper, automated tests, API documentation and GitHub Actions CI/CD.

Full-Stack Intern, Knowledge Academy

Sep 2023 – Dec 2024

- Built and consumed RESTful APIs with C#, ASP.NET and relational databases for backend integration.
- Developed responsive React, JavaScript and Bootstrap interfaces connected to those backend features.

Education

B.Sc. in Computer Systems Engineering, Palestine Technical University – Kadoorie, Tulkarm | Sep 2021 – Jun 2026

- GPA 93.21/100, ranked 1st in the College of Engineering & Technology.

High School (Tawjihi, Scientific Stream), Anabta Girls Secondary School | 2017 – 2021

- Average 99.4/100.

English Access Microscholarship Program, Tulkarm | 2017 – 2019

Two-year intensive interactive program focused on advanced English language mastery and leadership communication.

Achievements and Certifications

- **ICPC Africa and Arab Collegiate Programming Contest for Girls:** 25th place, Africa and Arab region (2023)
- **ICPC Palestinian Collegiate Programming Contest:** 20th place nationwide (2022)
- **Competitive programming:** 918+ Codeforces and 120+ LeetCode problems solved
- **Udemy:** Complete Guide to Building an App with .NET Core and React (2025)

Languages

- Arabic (native).
- English (B2–C1).
