SUMMARY

Backend-focused software engineer with two internships and hands-on experience building ASP.NET Core APIs, secure multi-tenant applications, automated tests and Azure deployments. Led a four-person graduation team on a platform spanning 290+ REST endpoints; ranked first in the College of Engineering and Technology (93.21/100).

TECHNICAL SKILLS

Backend: C#, .NET 8, ASP.NET Core Web API, EF Core, LINQ, SQL Server, REST APIs, relational databases
Architecture & Security: Clean Architecture, CQRS/MediatR, SOLID, dependency injection, Repository/Unit of Work, multi-tenancy, ASP.NET Identity, JWT/refresh tokens, RBAC, policy-based authorization
Testing & Delivery: xUnit, Moq, AutoFixture, FluentValidation, Swagger/OpenAPI, Postman, Git, GitHub Actions CI/CD, Azure App Service, Azure SQL
Additional: SignalR, background workers, AutoMapper, Ollama/LLMs, React, TypeScript, JavaScript, C++, algorithms

SELECTED ENGINEERING PROJECTS

Collabrium | Team Lead & Backend Developer | Code — Oct 2025 - Jun 2026

- Led a four-person team in two-week Agile sprints, turning requirements into API contracts for a multi-tenant management platform covering 13 functional domains.
- Developed .NET 8 backend features within a four-project Clean Architecture; the platform exposes 290+ REST endpoints across 31 controllers using CQRS/MediatR, EF Core, SQL Server and read models.
- Implemented Identity, rotating JWT refresh tokens, tenant isolation and layered authorization across 13 roles, policies and project access; enforced work-item and sprint business rules.
- Added SignalR and event-driven email notifications, scheduled background workers and 10 PDF/chart reports; integrated local Ollama/Gemma 3 AI with validation, retry and fallback paths.

Hotel Booking Platform | Backend Developer | Code — Dec 2024 - Jan 2025

- Built 52 REST endpoints for search, booking, reviews, discounts and amenities, with availability/capacity validation, email confirmations and PDF invoices.
- Wrote 100+ xUnit tests using Moq and AutoFixture for booking rules, invoice calculations, authorization and transaction rollback.

Actify | Full-Stack Developer | Code — Aug 2025 - Sep 2025

- Built a .NET 8 and React/TypeScript social activity app with Identity, CQRS, photo uploads and live SignalR comments; automated build and deployment with GitHub Actions.

PROFESSIONAL EXPERIENCE

Foothill Technology Solutions | Backend Intern — Aug 2024 - Jan 2025

- Developed and deployed an Azure-hosted capstone API with 50+ endpoints using Clean Architecture, FluentValidation, AutoMapper, automated tests, API documentation and GitHub Actions CI/CD.
- Completed structured C#, EF Core, ASP.NET Core, SOLID, design patterns and unit-testing training through exercises and mini-projects.

Knowledge Academy | Full-Stack Intern — Sep 2023 - Dec 2024

- Built and consumed ASP.NET REST APIs backed by relational databases; connected them to responsive React, JavaScript and Bootstrap interfaces.

EDUCATION

B.Sc. Computer Systems Engineering | Palestine Technical University - Kadoorie | Jun 2026

- GPA 93.21/100; ranked 1st in the College of Engineering and Technology.

ACHIEVEMENTS

- ICPC: 25th, Africa & Arab Girls Contest (2023).
- PCPC: 20th, Palestinian Collegiate Contest (2022).
- Problem Solving: 918+ Codeforces and 120+ LeetCode problems solved.

LANGUAGES

- Arabic native.
- English B2-C1.
