SUMMARY

Software Engineer with a strong focus on .NET backend development, with hands-on experience building REST APIs, database-backed systems, and real-time features using .NET 8, ASP.NET Core, EF Core, SQL Server, JWT, and SignalR. Led backend delivery for a 4-member graduation team, translating requirements into domain rules, API contracts, and implementation.

PROFESSIONAL EXPERIENCE

Backend Intern - Foothill Technology Solutions, LLC Aug 2024 – Jan 2025

- Completed structured backend engineering training in C#, Git, clean code, SOLID/design patterns, unit testing, databases, EF Core, ASP.NET Core Web API, and software architecture through hands-on exercises and mini-projects, culminating in a deployed 50+ endpoint final backend project.
- Implemented Clean Architecture, FluentValidation, AutoMapper, automated testing, API documentation, and GitHub Actions CI/CD while developing and deploying the final backend project to Azure.

Full Stack Intern - Knowledge Academy Sep 2023 – Dec 2024

- Built and consumed RESTful APIs with C#, ASP.NET, and relational databases for backend system integration.
- Developed responsive React, JavaScript, and Bootstrap interfaces integrated with backend functionality.

PROJECTS

Collabrium - Team Lead & Backend Developer Oct 2025 – Jun 2026

Integrated Enterprise Management Platform | Graduation Project

- Led a 4-member team in two-week Agile sprints to deliver a multi-tenant platform spanning 13 modules: Auth, Tenants, Users/Skills, Teams, Projects, Work Items, Sprints, Learning, Community, Notifications, Reports, AI & Metadata.
- Engineered 290+ .NET 8 API endpoints across 31 controllers with four-project Clean Architecture, CQRS/MediatR, EF Core/SQL Server, Repository/UoW & read models.
- Implemented ASP.NET Identity/JWT, refresh-token rotation, tenant isolation, and layered role/policy/project authorization across 13 roles; enforced work-item & sprint domain rules.
- Built event-driven SMTP email/SignalR notifications and scheduled workers; produced 10 PDF/chart reports and sprint summaries; integrated Ollama/Gemma 3 AI for work items, roadmaps, skill gaps & insights with retries/fallbacks.

Actify Aug 2025 – Sep 2025

- Built a full-stack .NET/React application using Clean Architecture, CQRS/MediatR, EF Core, ASP.NET Identity, and SignalR, with secure REST APIs and real-time features.

Hotel Booking Platform Dec 2024 – Jan 2025

- Built a .NET 8 Hotel Booking REST API with 50+ documented endpoints spanning authentication, hotels, rooms, bookings, guests, reviews, discounts, cities, amenities, and administration using ASP.NET Core, EF Core, SQL Server, JWT, and xUnit.
- Implemented search/filtering, email notifications, PDF invoice generation, and Swagger/Postman documentation; Configured a GitHub Actions CI workflow; separately deployed the backend API to Azure App Service.

EDUCATION

Bachelor's Degree in Computer Systems Engineering Sep 2021 – Jun 2026
